 - viii. Pharmacology of applicable anaesthetic agents
 - ix. Surgical airway control – cricothyrotomy
- e. The Emergency Medicine Resident will:
 - i. Insert an oral and nasopharyngeal airway
 - ii. Manually ventilate (bag-valve-mask)
 - iii. Perform direct laryngoscope
 - iv. Insert an end tracheal tube, oral and nasal
 - v. Mechanically ventilate

- vi. Initiate venous access, peripheral and central
- vii. Manage fluid status of an ill/anaesthetized patient
- viii. Induce anaesthesia
 - 1. With paralysis
 - 2. Without paralysis
- ix. Rapid Sequence Induction
- x. conscious sedation
- xi. administer selective regional anaesthesia
- xii. anticipate and appropriately handle emergent situations

2. Communicator

- a. communicate effectively and compassionately with the patient and family
- b. Establish therapeutic relationships with patients/families.
- c. Obtain and synthesize relevant history from patients/families/communities.
- d. Listen effectively.
- e. Discuss appropriate information with patients/families and the health care team.

3. Collaborator

- a. Understand the importance of a multidisciplinary team and interact effectively with physicians, nurses, and other health professionals
- b. Consult effectively with other physicians and health care professionals.
- c. Contribute effectively to other interdisciplinary team activities.

4. Manager

- a. Allocate finite health care resources wisely.
- b. Understand the basic principles of quality assurance/risk management issues
- c. Utilize information technology to optimize patient care, life-long learning and other activities
- d. Utilize resources effectively to balance patient care, learning needs, and outside activities.
- e. Work effectively and efficiently in a health care organization.

5. Health Advocate

- a. Contribute effectively to improved health of patients and communities.
- b. Develop an understanding of the bioethical issues affecting patients.
- c. Identify the important determinants of health affecting patients.
- d. Recognize and respond to those issues where advocacy is appropriate.
- e. Understand various approaches to health care advocacy and policy change

6. Scholar

- a. Apply best practice to patient care decisions, based on critical appraisal of relevant literature.
- b. Contribute to development of new knowledge.
- c. Demonstrate the skills of self-assessment and self-directed learning by identifying their own areas of improvement and addressing them with resources available.
- d. Develop, implement and monitor a personal continuing education strategy.
- e. Facilitate learning of patients, medical trainees/students and other health professionals.

7. Professional

- a. Deliver highest quality care with integrity, honesty and compassion.
- b. Demonstrate the maturity and responsibility expected of all professionals
- c. Exhibit appropriate personal and interpersonal professional behaviours.
- d. Practice medicine ethically consistent with obligations of a physician.
- e. Demonstrate understanding of the principles of informed consent and apply this to anesthetic care
