Brampton	Traditional block	<ul style="list-style-type: none"> • Two blocks of Obstetrics/Women’s Health • GIM & Hospitalist rotations are shift based and there is no CTU on rotations except Pediatrics • Residents have the option of doing their Emergency rotation at the Brampton Civic Hospital or Etobicoke General Hospital. 	This will be done at a site other than the resident’s core FM site. Residents will be placed in rural and under-serviced communities and are encouraged to consider remote locations. Opportunities exist for this rotation in Inuvik and other NWT communities.	<ul style="list-style-type: none"> •Horizontal elective time during FM • Block elective time in PGY2
Grand Erie Six Nations	Traditional block	Pediatrics rotation is designed as three weeks inpatient, three weeks outpatient and two weeks of developmental pediatrics.	This will be done at a site other than the resident’s core FM site. Residents will be placed in rural and under-serviced communities and are encouraged to consider remote locations. Opportunities exist for this rotation in Inuvik and other NWT communities.	<ul style="list-style-type: none"> •Horizontal elective time during FM • Block elective time in PGY2
Hamilton	Traditional block	<p>The Hamilton site has a maternity Centre which is a low risk OB clinic staffed by family physicians and NP’s. All Hamilton-based residents will spend time here during their program. During the two blocks of OB, one block will be spent in an innovative Mat Child rotation that incorporates low risk OB, newborn care and a variety of outpatient experiences. One block will be on a traditional OB rotation.</p> <p>For Care of Children, residents will be placed at the McMaster Children’s Hospital with one block in the pediatric emergency room and one block of combined inpatient and outpatient experiences.</p>	This will be done at a site other than the resident’s core FM site. Residents will be placed in rural and under-serviced communities and are encouraged to consider remote locations. Opportunities exist for this rotation in Inuvik and other NWT communities.	<ul style="list-style-type: none"> •Horizontal elective time during FM • Block elective time in PGY2
Halton	Traditional block	Care of the Elderly rotations will include working in the Geriatric Assessment Unit, the Geriatric Outreach Team and St. Joseph’s Community Health Centre within a geriatric outpatient setting.	This will be done at a site other than the resident’s core FM site. Residents will be placed in rural and under-serviced communities and are encouraged to consider remote locations. Opportunities exist for this rotation in Inuvik and other NWT communities.	<ul style="list-style-type: none"> •Horizontal elective time during FM • Block elective time in PGY2
